

rMaps

Building Data Products

Brian Caffo, Jeff Leek, Roger Peng
Johns Hopkins Bloomberg School of Public Health

BONUS RMaps!!!

- There's a new github repository describing connections between more mapping libraries and R
 - We already saw leaflet

```
library(devtools);  
require(devtools)  
install_github('ramnathv/rCharts@dev')  
install_github('ramnathv/rMaps')
```

Creating a map

```
#library(rjson); library(rMaps)
#crosslet(
#  x = "country",
#  y = c("web_index", "universal_access", "impact_empowerment", #"freedom_openness"),
#  data = web_index
#)
```
